MVP Feature Summary for Fabrication Quoting SaaS

Based on our initial discussions about quote contents, the provided workflow diagrams, and the competitive analysis of Paperless Parts, QuickWorks MRP, and Statii, here's a summary of core features for our SaaS application:

Core Quote Content Features (from initial discussion):

- **Company Details & Logo:** Ability to configure and display the user's company information and logo on quotes.
- **Client Details:** Fields for capturing and displaying client company and contact information.
- **Unique Quote Numbering:** Automatic generation of unique quote IDs.
- **Quote Date & Expiry Date:** Fields for setting and displaying these dates.
- **Project Title/Name & Summary:** Clear fields for defining the project.
- **Detailed Line Items:**
  - Item/Service Description
  - Quantity & Units
  - Unit Price
  - Line Total calculation
- **Cost Summary:**
  - Subtotal calculation
  - VAT/Tax calculation (with configurable rates)
  - Discount application
  - Shipping/Delivery/Installation Costs (manual input initially)
  - Grand Total calculation
- **Terms & Conditions:** Customizable section for payment terms, project timeline, quote validity, exclusions, and change order process.
- **Attachments:** Ability to attach documents (drawings, specs, photos) to the quote.
- **Call to Action & Signature Lines:** Clear instructions for acceptance and signature fields.

Workflow & Process Features (from workflow diagram):

- **Quote Creation (Draft):** Ability to create and save quotes as drafts.
- **Review/Edit/Revise:** Functionality to modify existing quotes.
- **Export Options:** Initial support for exporting quotes (e.g., PDF for sending).
- **Email to Client:** Direct emailing of quotes from the application.
- **Client Response Tracking:** Ability to mark quotes as Accepted, Declined, or No Response.
- **Follow-up Automation:** Basic automated follow-up reminders for 'No Response' quotes.
- **Conversion to Invoice:** One-click conversion of accepted quotes to a basic invoice (initially, this might just be a status change and data transfer, not a full invoicing system).

Key Learnings from Competitive Analysis (Strengths to Emulate/Address):

- **Speed & Efficiency:** The ability to generate quotes rapidly is paramount (Paperless Parts, Statii).
- **Professionalism & Branding:** High-quality, branded quote output is essential (QuickWorks, Paperless Parts).
- **Accuracy & Automation:** Automated calculations to minimize errors (all competitors).
- **Centralized Management:** A dashboard to track quote status and history (QuickWorks, Paperless Parts).
- **Integration (Future Consideration):** While not MVP, accounting integration is a strong selling point (QuickWorks).
- **Transparent Pricing (for our own business model):** Competitors like QuickWorks and Statii offer transparent pricing, which is a good practice for SaaS.
- **UK Specificity:** Being tailored to the UK market is a distinct advantage (QuickWorks, Statii).
- **Inventory Integration (Future Consideration):** Statii's strong inventory integration is a powerful feature for fabrication.

This summary forms the basis for prioritizing features for our MVP, focusing on what's essential to deliver immediate value and address core pain points for UK fabrication businesses.
